WELDING JOURNAL INDEX

VOLUME 56—1977

PUBLISHED BY AMERICAN WELDING SOCIETY, 2501 N.W. 7TH ST., MIAMI, FL 33125

Part 1—WELDING JOURNAL

SUBJECT INDEX

Adams Lecture: Developing Precision Assembly by Welding, 1977 Comfort A. – Peter T. Houldcroft, 15 to 25, (Aug).
Additive Helps Solve Problem of Rejects During Thermal Spraying Operation, Fuel Gas – H. C. Phelps, 32 to 35, (July).
Air Carbon Arc Gouging – D. Panter, 32 to 37, (May).
Aircraft Gas Turbine Application, Nickel-Base Brazing Filler Metals for – R. D. Eng, E. J. Ryan and J. R. Doyle, 15 to 21, (Oct).
*All-Welded Bridge Stands Up To The Test Of Time, World's First – 38 to 39, (July).
*Aluminum LNG Tanks Take Shape at Mobile – 42 to 43, (Nov).
Aluminum, On the Stabilization of GMA Welding of – M. Kiyohara, T. Okada, Y. Wakino and H. Yamamoto, 20 to 28, (Mar).
Alyeska – A Welding Milestone – J. C. Wormeli, 31 to 38, (Sept).
Approach to Procedure Selection in Arc Welding, An – S. B. Jones, J. Doherty and G. R. Salter, 19 to 31, (July).
*Arcs: How Far Away Is Safe?, Welding – 34 to 35, (Mar).
Arc Welding, An Approach to Procedure Selection in – S. B. Jones, J. Doherty and G. R. Salter, 19 to 31, (July).
*Art in Weathering Steel, Metropolitan Life's "Big Bird"—Welded – 40 to 41, (Dec).
*Automation for Low Production Firms, Limited – 42, (May).

*Beam Positioner Handles Massive Weldments With Relative Ease – 46, (June).
Bevel, Development of the 37½ Degree Pipe – J. A. Disney, 36 to 39, (Dec).
*"Big Bird" – Welded Art in Weathering Steel, Metropolitan Life's – 40 to 41, (Dec).
Big Tools for Deep Space – R. M. Powers, 13 to 16, (Feb).
Brazing of Ceramics, Graphite and Refractory Metals, Direct – D. A. Canonico, N. C. Cole and G. M. Slaughter, 31 to 40, (Aug).
*Brazing Copper-to-Copper to Withstand 3,000 psi – 40, (Oct).
Brazing Filler Metals for Aircraft Gas Turbine Applications, Nickel-Base – R. D. Eng, E. J. Ryan and J. R. Doyle, 15 to 21, (Oct).
Brazing, New Forms of Filler Materials for Diffusion – P. E. Doherty and D. R. Harraden, 37 to 39, (Oct).
*Brazing – One Way to High Quality, Precision Joining, Furnace – 41, (Oct).
Brazing Stainless Steel in a Stable Reducing Atmosphere of Fluoride – J. Parmentier and P. Calmels, 15 to 22, (Nov).
*Bridge Stands Up To The Test Of Time, World's First All-Welded – 38 to 39, (July).

Carbon Arc Gouging, Air – D. Panter, 32 to 37, (May).
Castings for Ship Construction, Electroslag Welding of Large – A. Brøsholen, E. Skaug and J. J. Viser, 26 to 30, (Aug).
Cast Iron Welding, Gray – J. Klimek and A. V. Morrison, 29 to 33, (Mar).
Cast Iron, Welding of Gray – A. G. Hogaboom, 17 to 21, (Feb).
Ceramics, Graphite and Refractory Metals, Direct Brazing of – D. A. Canonico, N. C. Cole and G. M. Slaughter, 31 to 40, (Aug).
*Circuit Boards, Solder Coating and Leveling of Printed – 44, (Oct).
Compressor Rotor, Manufacture of an Electron Beam Welded Turbine Engine – J. A. Miller, 24 to 29, (May).
Construction of Overland Pipelines – L. D. Garrett, 26 to 29, (Sept).
Control and Deflection Systems Improve Electron Beam Welding Applications, New High-Speed Beam Current – R. Mayer, W. Dietrich and D. Sundermeyer, 35 to 41, (June).
Copper-Aluminum Pipe Joints, Ultrasonic Soldering Method for – D. Oelschlagel, H. Abe, K. Yamaji and Y. Yonezawa, 20 to 27, (Apr).
Copper-Clad Niobium-Titanium Superconductor Composite, Soldering of – A. J. Moorhead, J. J. Woodhouse and D. S. Easton, 23 to 31, (Oct).
Copper-Nickel Ships, Welding – M. Prager and E. W. Thiele, Jr., 15 to 23, (May).
*Copper-to-Copper to Withstand 3,000 psi, Brazing – 40, (Oct).
*Cryogenic Tanks Undergo "R&R" – Repair and Radiography—in Delphi, Indiana—40 to 41, (May).
*Cutting of Stainless Steel, Iron Powder/Oxypropane – H. C. Phelps, 38 to 39, (Apr).
*Cylinders Used for Simultaneous Assembly and Welding, Hydraulic Workholding – 42, (Dec).

Development of Automated Pipe and Tube Welding Techniques for Aluminum – D. P. Edmonds, G. M. Goodwin and G. M. Slaughter, 22 to 25, (Feb).
Development of Techniques for Remote Plasma Arc Cutting of a Nuclear Reactor Vessel – C. H. Wodtke and W. A. Plunkett, 15 to 22, (Dec).
Development of the 37½ Degree Pipe Bevel – J. A. Disney,

A Practical Welder article

36 to 39, (Dec).
Diffusion Brazing, New Forms of Filler Materials for – P. E. Doherty and D. R. Harraden, 37 to 39, (Oct).
Direct Brazing of Ceramics, Graphite and Refractory Metals – D. A. Canonico, N. C. Cole and G. M. Slaughter, 26 to 30, (Aug).
*Dissimilar Metal Joints to Minimize Corrosion and Simplify Joining, Transition Spacers Developed for – 51 to 53, (Sept).
*Door Welding System Boosts Production 50%, New Steel – 44, (Nov).
*Ducts – Their Construction, Selection & Use, Flexible – 45, (June).

*Efficient Welding Fume Removal System Helps Control Working Area Temperature – 37, (Jan).
*Electric Arc Spraying – Answer to Prolonging Cutting Tool Life – 27 to 28, (Feb).
*Electrodes – Right Filler Metal for Reaction Vessels, Type 316L Stainless Steel – 35, (Jan).
Electrodes, The New Moisture Resistant – L. M. Barbin, 15 to 18, (July).
Electron Beam Welded Turbine Engine Compressor Rotor, Manufacture of an – J. A. Miller, 24 to 29, (May).
Electron Beam Welding Applications, New High-Speed Beam Current Control and Deflection Systems Improve – R. Mayer, W. Dietrich and D. Sundermeyer, 35 to 41, (June).
Electroslag Welding of Large Castings for Ship Construction – A. Brøsholen, E. Skaug and J. J. Viser, 26 to 30, (Aug).
External Tank of the Space Shuttle, Hard Tooling for the Fabrication of the – G. W. Oyler and F. R. Clover, Jr., 23 to 30, (Dec).

Fabrication of Large Surface Mining Machinery – T. Learmont, 20 to 25, (Jan).
Failure Prevention in Structural Welding – T. J. Dawson and M. Yachnis, 30 to 35, (Nov).
Filler Materials for Diffusion Brazing, New Forms of – P. E. Doherty and D. R. Harraden, 37 to 39, (Oct).
Filler Metals for Aircraft Gas Turbine Application, Nickel-Base Brazing – R. D. Eng, E. J. Ryan and J. R. Doyle, 15 to 21, (Oct).
*Flexible Ducts–Their Construction, Selection & Use – 45, (June).
Fluoride, Brazing Stainless Steel in a Stable Reducing Atmosphere of – J. Parmentier and P. Calmels, 15 to 22, (Nov).
*Four Creations by a Metallurgist, Welded Sculpture – 26 to 27, (Feb).
*Frame Designed With Its Welds In Mind, Tractor Roll – by A. A. Amberg, 42 to 43, (June).
Fuel Gas Additive Helps Solve Problem of Rejects During Thermal Spraying Operation – H. C. Phelps, 32 to 35, (July).
*Fume Removal System Helps Control Working Area Temperature, Efficient Welding – 37, (Jan).
Functional Alloy Approach to Soldering – J. P. Langan and L. Souzis, 13 to 17, (Jan).
*Furnace Brazing – One Way to High Quality, Precision Joining – 41, (Oct).

Gas Tungsten Arc Welding, Investigation of Pulsed Wave Shapes for – W. Troyer, M. Tomsic and R. Barhorst, 26 to 32, (Jan).
Gas Welding Origins – A. C. Nunes, Jr., 15 to 23, (June).
GMA Welding of Aluminum, On the Stabilization of – M. Kiyohara, T. Okada, Y. Wakino and H. Yamamoto, 20 to 28, (Mar).
Gouging, Air Carbon Arc – D. Panter, 32 to 37, (May).
Gray Cast Iron Welding – J. Klimek and A. V. Morrison, 29 to 33, (Mar).

*Hardfacing Renews Printing Press Rollers, 38, (May).
Hard Tooling for the Fabrication of the External Tank of the Space Shuttle – G. W. Oyler and F. R. Clover, Jr., 23 to 30, (Dec).
High Frequency Melt Welding – W. C. Rudd and H. N. Udall, 28 to 32, (Apr).
History of Pipe Line Welding – Part 1 – A. G. Barkow, 15 to 23, (Sept).
History of Pipe Line Welding – Part II – A. G. Barkow, 23 to 28, (Nov).
*Hydraulic Lift Manufacturer Beat Shortages, Welding Helps – 36, (Jan).
*Hydraulic Press Ram, Thermal Spraying Saves 75% of Replacement Cost for – 41, (Aug).
*Hydraulic Workholding Cylinders Used for Simultaneous Assembly and Welding, 42, (Dec).

*In-Motion Radiography Speeds Tank Weld Inspection – 42 to 43, (Aug).
Investigation of Pulsed Wave Shapes for Gas Tungsten Arc Welding – W. Troyer, M. Tomsic and R. Barhorst, 26 to 32, (Jan).
*Iron Powder/Oxypropane Cutting of Stainless Steel – H. C. Phelps, 38 to 39, (Apr).

*"Knight" in Welding Helmet Saves Welded Sculpture – 40, (Apr).

*Lady, Savannah River Project Pipe Welder is a – 42 to 44, (Dec).
*Lengthen Steel Sheet in a Ship Yard, Welding to – 36, (Mar).
*Limited Automation for Low Production Firms, 42, (May).
*LNG Tanks Take Shape at Mobile, Aluminum – 42 to 43, (Nov).
*Low Production Firms, Limited Automation for – 42, (May).

Machinery, The Fabrication of Large Surface Mining – T. Learmont, 20 to 25, (Jan).
Manufacture of an Electron Beam Welder Turbine Engine Compressor Rotor – J. A. Miller, 24 to 29, (May).
Melt Welding, High Frequency – W. C. Rudd and H. N. Udall, 28 to 32, (Apr).
*Metropolitan Life's "Big Bird" – Welded Art in Weathering Steel – 40 to 41, (Dec).
Mining Machinery, The Fabrication of Large Surface – T. Learmont , 20 to 25, (Jan).
Moisture Resistant Electrodes, The New – L. M. Barbin, 15 to 18, (July).

New Forms of Filler Materials for Diffusion Brazing – P. E. Doherty and D. R. Harraden, 37 to 39, (Oct).
New High-Speed Beam Current Control and Deflection Systems Improve Electron Beam Welding Applications – R. Mayer, W. Dietrich and D. Sundermeyer, 35 to 41, (June).
New Moisture Resistant Electrodes, The – L. M. Barbin, 15 to 18, (July).
*New Steel Door Welding System Boosts Production 50% – 44, (Nov).
Nickel-Base Brazing Filler Metals for Aircraft Gas Turbine Application – R. D. Eng, E. J. Ryan and J. R. Doyle, 15 to 21, (Oct).

A Practical Welder article

1977 Comfort A. Adams Lecture: Developing Precision Assembly by Welding – Peter T. Houldcroft, 15 to 25, (Aug).
North Sea – The Challenge of Offshore Pipelining – R. J. Brown, 39 to 48, (Sept).
Nuclear Reactor Vessel, Development of Techniques for Remote Plasma Arc Cutting of a – C. H. Wodtke and W. A. Plunkett, 15 to 22, (Dec).

Offshore Pipelining, North Sea – The Challenge of – R. J. Brown, 39 to 48, (Sept).
On the Stabilization of GMA Welding of Aluminum – M. Kiyohara, T. Okada, Y. Wakino and H. Yamamoto, 20 to 28, (Mar).
Origins, Gas Welding – A. C. Nunes, Jr., 15 to 23, (June).
Overland Pipelines, Construction of – L. D. Garrett, 26 to 30, (Sept).
Oxyacetylene Welders to Join Mild Steel Pipe, Training of – W. L. Ballis, C. DeHaven and R. Baker, 15 to 19, (Apr).

*Paperboard Plant Beats High Replacement Part Costs with Thermal Spraying – 34, (Jan).
Pipe and Tube Welding Techniques for Aluminum, Development of Automated – D. P. Edmonds, G. M. Goodwin and G. M. Slaughter, 22 to 25, (Feb).
Pipe Bevel, Development of the 37½ Degree – J. A. Disney, 36 to 39, (Dec).
Pipe Defects by Full-Encirclement Sleeves, Repair of Line – J. F. Kiefner, 26 to 34, (June).
Pipe Joints, Ultrasonic Soldering Method for Copper-Aluminum – D. Oelschlagel, H. Abe, K. Yamaji and Y. Yonezawa, 20 to 27, (Apr).
Pipelines, Construction of Overland – L. D. Garrett, 26 to 29, (Sept).
*Pipeline, Undersea Welders Dive 230 Feet to Repair – 38, (Mar).
Pipe Line Welding–Part 1, History of – A. G. Barkow, 15 to 23, (Sept).
Pipe Line Welding – Part II, History of – A. G. Barkow, 23 to 28, (Nov).
Pipelining, North Sea – The Challenge of Offshore – R. J. Brown, 39 to 48, (Sept).
Pipe, Training of Oxyacetylene Welders to Join Mild Steel – W. L. Ballis, C. DeHaven and R. Baker, 15 to 19, (Apr).
*Pipe Welder is a Lady, Savannah River Project – 42 to 44, (Dec).
Plasma Arc Cutting of a Nuclear Reactor Vessel, Development of Techniques for Remote – C. H. Wodtke and W. A. Plunkett, 15 to 22, (Dec).
*Positioner Handles Massive Weldments with Relative Ease, Beam – 46, (June).
*Potomac River Underwater Crossing, Stud Welding Gives Assist to – 54, (Sept).
Practical Look at Underwater Shielded Metal Arc Welding, A – James R. Schwarz, 32 to 35, (Dec).
Precision Assembly by Welding, 1977 Comfort A. Adams Lecture: Developing – Peter T. Houldcroft, 15 to 25, (Aug).
Prevention in Structural Welding, Failure – T. J. Dawson and M. Yachnis, 30 to 35, (Nov).
*Printed Circuit Boards, Solder Coating and Leveling of – 44, (Oct).
*Printing Press Rollers, Hardfacing Renews, 38, (May).
Procedure Selection in Arc Welding, An Approach to – S. B. Jones, J. Doherty and G. R. Salter, 19 to 31, (July).
Pulsed Wave Shapes for Gas Tungsten Arc Welding, Investigation of – W. Troyer, M. Tomsic and R. Barhorst, 26 to 32, (Jan).
*Pump Screw Salvaged by Surfacing at Only 30% of Replacement Cost – 41, (July).

Quality Assurance – An Effective System for Assuring Quality Welding, Total – D. J. Wiedenheft, 15 to 19, (Mar).
Quality Welding, Total Quality Assurance – An Effective System for Assuring – D. J. Wiedenheft, 15 to 19, (Mar).

*Reaction Vessels, Type 316L Stainless Steel Electrodes – Right Filler Metal for – 35, (Jan).
Remote Plasma Arc Cutting of a Nuclear Reactor Vessel, Development of Techniques for – C. H. Wodtke and W. A. Plunkett, 15 to 22, (Dec).
*Repair and Radiography – in Delphi, Indiana, Cryogenic Tanks Undergo "R&R" – 40 to 41, (May).
Repair of Line Pipe Defects by Full-Encirclement Sleeves – J. F. Kiefner, 26 to 34, (June).

*Savannah River Project Pipe Welder is a Lady – 42 to 44, (Dec).
Screenable Solder Paste – I. W. H. Lee, 32 to 36, (Oct).
*Sculpture, "Knight" in Welding Helmet Saves Welded – 40, (Apr).
Selection in Arc Welding, An Approach to Procedure – S. B. Jones, J. Doherty and G. R. Salter, 19 to 31, (July).
Shielded Metal Arc Welding, A Practical Look at Underwater – James R. Schwarz, 32 to 35, (Dec).
Ship Construction, Electroslag Welding of Large Castings for – A. Brøsholen, E. Skaug and J. J. Viser, 26 to 30, (Aug).
Ships, Welding Copper-Nickel – M. Prager and E. W. Thiele, Jr., 15 to 23, (May).
*Ship Yard, Welding to Lengthen Steel Sheet in a – 36, (Mar).
*Simultaneous Assembly and Welding, Hydraulic Workholding Cylinders Used for – 42, (Dec).
Sleeves, Repair of Line Pipe Defects by Full-Encirclement – J. F. Kiefner, 26 to 34, (June).
*Solder Coating and Leveling of Printed Circuit Boards – 44, (Oct).
*Soldering Ensures Quality Control for Difficult Applications, Vapor-Phase – 42 to 43, (Oct).
Soldering Method for Copper-Aluminum Pipe Joints, Ultrasonic – D. Oelschlagel, H. Abe, K. Yamaji and Y. Yonezawa, 20 to 27, (Apr).
Soldering of Copper-Clad Niobium-Titanium Superconductor Composite – A. J. Moorhead, J. J. Woodhouse and D. S. Easton, 23 to 31, (Oct).
Soldering – The Functional Alloy Approach to – J. P. Langan and L. Souzis, 13 to 17, (Jan).
Solder Paste, Screenable – I. W. H. Lee, 32 to 36, (Oct).
Space, Big Tools for Deep – R. M. Powers, 13 to 16, (Feb).
*Spacers Developed for Disimiliar Metal Joints to Minimize Corrosion and Simplify Joining, Transition – 51, (Sept).
Space Shuttle, Hard Tooling for the Fabrication of the External Tank of the – G. W. Oyler and F. R. Clover, Jr., 23 to 30, (Dec).
*Stainless Steel Electrodes – Right Filler Metal for Reaction Vessels, Type 316L – 35, (Jan).
Stainless Steel in a Stable Reducing Atmosphere of Fluoride, Brazing – J. Parmentier and P. Calmels, 15 to 22, (Nov).
Structural Welding, Failure Prevention in – T. J. Dawson and M. Yachnis, 30 to 35, (Nov).
*Stud Welding Gives Assist to Potomac River Underwater Crossing – 54, (Sept).
Superconductor Composite, Soldering of Copper-Clad

A Practical Welder article

Niobium-Titanium – A. J. Moorhead, J. J. Woodhouse and D. S. Easton, 23 to 31, (Oct).
*Surfacing at Only 30% of Replacement Cost, Pump Screw Salvaged by – 41, (July).
*Surgically Clean Procedures Used for Welding F100 Titanium Rear Fan Duct Case – 30, (Feb).

Tank of the Space Shuttle, Hard Tooling for the Fabrication of the External – G. W. Oyler and F. R. Clover, Jr., 23 to 30, (Dec).
Thermal Spraying Operation, Fuel Gas Additive Helps Solve Problem of Rejects During – H. C. Phelps, 32 to 35, (July).
*Thermal Spraying, Paperboard Plant Beats High Replacement Part Costs with – 34, (Jan).
*Thermal Spraying Saves 75% of Replacement Cost for Hydraulic Press Ram – 41, (Aug).
*Titanium Rear Fan Duct Case, Surgically Clean Procedures Used for Welding F100 – 30, (Feb).
Tooling for the Fabrication of the External Tank of the Space Shuttle, Hard – G. W. Oyler and F. R. Clover, Jr., 23 to 30, (Dec).
*Tool Life, Electric Arc Spraying – Answer to Prolonging Cutting – 27 to 28, (Feb).
Tools for Deep Space, Big – R. M. Powers, 13 to 16, (Feb).
Total Quality Assurance – An Effective System for Assuring Quality Welding – D. J. Wiedenheft, 15 to 19, (Mar).
*Tower Becomes Its Own Stress Relieving Furnace – 31, (Feb).
*Tractor Roll Frame Designed With Its Welds In Mind – A. A. Amberg, 42 to 43, (June).
Training of Oxyacetylene Welders to Join Mild Steel Pipe – W. L. Ballis, C. DeHaven and R. Baker, 15 to 19, (Apr).
*Transition Spacers Developed for Dissimilar Metal Joints to Minimize Corrosion and Simplify Joining – 51 to 53, (Sept).
Tube Welding Techniques for Aluminum, Development of Automated Pipe and – D. P. Edmonds, G. M. Goodwin and G. M. Slaughter, 22 to 25, (Feb).
Turbine Engine Compressor Rotor, Manufacture of an Electron Beam Welded – J. A. Miller, 24 to 29, (May).
*Type 316L Stainless Steel Electrodes – Right Filler Metal for Reaction Vessels – 35, (Jan).

Ultrasonic Soldering Method for Copper-Aluminum Pipe Joints – D. Oelschlagel, H. Abe, K. Yamaji and Y. Yonezawa, 20 to 27, (Apr).
*Undersea Welders Dive 230 Feet to Repair Pipeline – 38, (Mar).
*Underwater Crossing, Stud Welding Gives Assist to Potomac River – 54, (Sept).
Underwater Shielded Metal Arc Welding, A Practical Look at – James R. Schwarz, 32 to 35, (Dec).

*Vapor-Phase Soldering Ensures Quality Control for Difficult Applications – 42 to 43, (Oct).

*Weathering Steel, Metropolitan Life's "Big Bird"–Welded Art in – 40 to 41, (Dec).
*Welded Sculpture – Four Creations by a Metallurgist – 26 to 27, (Feb).
*Welded Sculpture, "Knight" in Welding Helmet Saves – 40, (Apr).
Welders to Join Mild Steel Pipe, Training of Oxyacetylene – W. L. Ballis, C. DeHaven and R. Baker, 15 to 19, (Apr).
*Welding Arcs: How Far Away Is Safe? – 34 to 35, (Mar).
Welding Copper-Nickel Ships, – M. Prager, and E. W. Thiele, Jr., 15 to 23, (May).
*Welding Helps Hydraulic Lift Manufacturer Beat Shortages – 36, (Jan).
Welding of Gray Cast Iron – A. G. Hogaboom, 17 to 21, (Feb).
Welding Origins, Gas – A. C. Nunes, Jr., 15 to 23, (June).
Welding – Part II, History of Pipe Line – A.G. Barkow, 23 to 28, (Nov).
*Welding the Hard Way – 120 Feet Down – 38 to 40, (Nov).
*Welding to Lengthen Steel Sheet in a Ship Yard – 36, (Mar).
*Weldments with Relative Ease, Beam Positioner Handles Massive – 46, (June).
*World's First All-Welded Bridge Stands Up To The Test of Time – 38 to 39, (July).

Souzis, L. and Langan, J. P. – The Functional Alloy Approach to Soldering, 13 to 17, (Jan).
Sundermeyer, D., Mayer, R. and Dietrich, W. – New High-Speed Beam Current Control and Deflection Systems Improve Electron Beam Welding Applications, 35 to 41, (June).

Thiele, E. W., Jr. and Prager, M. – Welding Copper-Nickel Ships, 15 to 23, (May).
Tomsic, M., Barhorst, R. and Troyer, W. – Investigation of Pulsed Wave Shapes for Gas Tungsten Arc Welding, 26 to 32, (Jan).
Troyer, W., Tomsic, M. and Barhorst, R. – Investigation of Pulsed Wave Shapes for Gas Tungsten Arc Welding, 26 to 32, (Jan).

Udall, H. N. and Rudd, W. C. – High Frequency Melt Welding, 28 to 32, (Apr).

Viser, J. J., Brøsholen, A. and Skaug, E. – Electroslag Welding of Large Castings for Ship Construction, 26 to 30, (Aug).

Wakino, Y., Yamamoto, H., Kiyohara, M. and Okada, T. – On the Stabilization of GMA Welding of Aluminum, 20 to 28, (Mar).
Wiedenheft, D. J. – Total Quality Assurance–An Effective System for Assuring Quality Welding, 15 to 19, (Mar).
Wodtke, C. H. and Plunkett, W. A. – Development of Techniques for Remote Plasma Arc Cutting of a

A Practical Welder article

Nuclear Reactor Vessel, 15 to 22, (Dec).
Woodhouse, J. J., Easton, D. S. and Moorhead, A. J. – Soldering of Copper-Clad Niobium-Titanium Superconductor Composite, 23 to 31, (Oct).
Wormeli, J. C. – Alyeska – A Welding Milestone, 31 to 38, (Sept).

Yachnis, M. and Dawson, T. J. – Failure Prevention in Structural Welding, 30 to 35, (Nov).
Yamaji, K., Yonezawa, Y., Oelschlagel, D. and Abe, H. – Ultrasonic Soldering Method for Copper-Aluminum Pipe Joints, 20 to 27, (Apr).
Yamamoto, H., Kiyohara, M., Okada, T. and Wakino, Y. – On the Stabilization of GMA Welding of Aluminum, 20 to 28, (Mar).
Yonezawa, Y., Oelschlagel, D., Abe, H. and Yamaji, K. – Ultrasonic Soldering Method for Copper-Aluminum Pipe Joints, 20 to 27, (Apr).

Part 2–WELDING RESEARCH SUPPLEMENT

SUBJECT INDEX

Acceptance Levels of Weld Defects for Fatigue Service – C. F. Boulton, 13-s to 22-s, (Jan).
Alloy 800, Friction Welding, K. H. Holko, 140-s to 142-s, (May).
Aluminum Alloy Electron Beam Welds, High Cycle Fatigue Behavior of 5086-H116 – R. R. Hardy, Jr., 8-s to 12-s, (Jan).
Aluminum Alloy Weldments, An Investigation of Hot Cracking in 5083-O – J. C. Lippold, E. F. Nippes and W. F. Savage, 171-s to 178-s, (June).
Aluminum in Air, Fluxless Induction Brazing of – K. C. Lin, 51-s to 55-s, (Feb).
Aluminum, Metallurgical Studies of the Vacuum Brazing of – W. A. Anderson, 314-s to 318-s, (Oct).
Aluminum, The Mechanism of Expulsion in Weldbonding of Anodized – K. C. Wu, 238-s to 244-s, (Aug).
Analysis of a High Manganese Stainless Steel Weldability Problem – G. S. Mills, 186-s to 188-s, (June).
Arc Analysis, Use of Emission Spectroscopy for Welding – G. S. Mills, 93-s to 96-s, (Mar).
Arc and Pool Instability in GTA Welding – J. C. Metcalfe and M. B. C. Quigley – 133-s to 139-s, (May).
Arctic-Grade Line-Pipe Steels, The Weldability of Some – J. Gordine, 201-s to 210-s, (July).
Arc Welding, Inclusion Formation in – G. Thewlis and D. R. Milner, 281-s to 288-s, (Sept).
Attack in Welded Stress-Corrosion Resistant Stainless Steel, Intergranular – J. Honeycombe and T. G. Gooch, 339-s to 353-s, (Nov).
Austenitic Stainless Steel Weld Metal for Severe Corrosion Environments, Properties of a Fully – A. Backman and B. Lundqvist, 23-s to 28-s, (Jan).
Austenitic Stainless Steel Weld Metal, Technical Note: Ferrite Stability at Elevated Temperature in – J. E. Spruiell, W. E. Fett, and C. D. Lundin, 289-s to 290-s, (Sept).

Brass Filler, Furnace Brazing of Steel with – I. Kawakatsu and T. Osawa, 56-s to 60-s, (Feb).
Brazed Nickel/Columbium Dissimilar Metal Pipe Joints for 720 C Service – G. K. Watson and T. J. Moore, 306-s to 313-s, (Oct).
Brazing Experiment, The Skylab – T. A. Siewert, R. H. Heine, C. M. Adams, Jr., and J. R. Williams, 291-s to 300-s, (Oct).
Brazing Filler Metal BNi5, Investigations on the Capillary Flow of – E. Lugscheider and K. Iverson, 319-s to 324-s, (Oct).
Brazing of Aluminum in Air, Fluxless Induction – K. C. Lin, 51-s to 55-s, (Feb).
Brazing of Aluminum, Metallurgical Studies of the Vacuum – W. A. Anderson, 314-s to 318-s, (Oct).
Brazing of Steel with Brass Filler, Furnace – I. Kawakatsu and T. Osawa, 56-s to 60-s, (Feb).
Brazing Wire, Development of a Composite – H. Kawano, D. Oelschlagel and K. Yamaji, 325-s to 330-s, (Oct).
Butt Joint Welds, Influence of Bending Stresses on Fatigue Crack Propagation Life in – J. D. Burk and F. V. Lawrence, 61-s to 66-s, (Feb).

Calculation of Strength of Single-Lap Shear Specimen – E. Lugscheider, H. Reiman and O. Knotek, 189-s to 192-s, (June).
Capillary Flow of Brazing Filler Metal BNi5, Investigations on the – E. Lugscheider and K. Iverson, 319-s to 324-s, (Oct).
Cause and Prevention of 12% Chromium Steel Fillet Weld Cracks – H. R. Castner, 193-s to 200-s, (July).
Charpy V-Notch Testing Narrow Zones in Welds, A Fundamental Difficulty in – J. A. Goldak and D. S. Nguyen, 119-s to 125-s, (Apr).
Chromium Steel Fillet Weld Cracks, Cause and Prevention of 12% – H. R. Castner, 193-s to 200-s, (July).
Clad Solder for Semiconductor Devices – S. Mitsugi, D. Oelschlagel, K. Yamaguchi, K. Yamaji and K. Konishi – 301-s to 305-s, (Oct).
Composite Brazing Wire, Development of a – H. Kawano, D. Oelschlagel and K. Yamaji, 325-s to 330-s, (Oct).
Composition on Weld Metal Microstructures in a C/Mn and a HSLA Steel, The Influence of Cooling Rate and – A. G. Glover, J. T. McGrath, M. J. Tinkler and G. C. Weatherly, 267-s to 273-s, (Sept).
Contact Resistance of Series Spot Welds, Static – W. F. Savage, E. F. Nippes and F. A. Wassell, 365-s to 370-s, (Nov).
Controlled Weld-Pool Solidification Structure and Resultant Properties with Yttrium Inoculation of Ti-6A1-6V-2Sn Welds – R. P. Simpson, 67-s to 77-s, (Mar).
Cooling Rate and Composition on Weld Metal Microstructures in a C/Mn and a HSLA Steel, The Influence of – A. G. Glover, J. T. McGrath, M. J. Tinkler and G. C. Weatherly, 267-s to 273-s, (Sept).
Correction Factor for Stress Intensity at Welded Stiffeners and Cover Plates, Stress Gradient – N. Zettlemoyer and J. W. Fisher, 393-s to 398-s, (Dec.)
Corrosion Environments, Properties of a Fully Austenitic Stainless Steel Weld Metal for Severe – A. Backman and B. Lundqvist, 23-s to 28-s, (Jan).
Cover Plates, Stress Gradient Correction Factor for Stress Intensity at Welded Stiffeners and – N. Zettlemoyer and J. W. Fisher, 393-s to 398-s, (Dec).
Crack Growth in a Type 316 Stainless Steel Weld Metal, Creep – J. R. Haigh, 149-s to 153-s, (May).
Cracking in 5083-O Aluminum Alloy Weldments, An Investigation of Hot – J. C. Lippold, E. F. Nippes and W. F. Savage, 171-s to 178-s, (June).
Cracking in Underwater Steel Welds, A Study of Hydrogen – H. Ozaki, J. Naiman and K. Masubuchi, 231-s to

237-s, (Aug).
Crack Propagation Life in Butt Joint Welds, Influence of Bending Stresses on Fatigue – J. D. Burk and F. V. Lawrence, 61-s to 66-s, (Feb).
Cracks, Cause and Prevention of 12% Chromium Steel Fillet Weld – H. R. Castner, 193-s to 200-s, (July).
Creep Crack Growth in a Type 316 Stainless Steel Weld Metal – J. R. Haigh, 149-s to 153-s, (May).

Defects for Fatigue Service, Acceptance Levels of Weld – C. F. Boulton, 13-s to 22-s, (Jan).
Development of a Composite Brazing Wire – H. Kawano, D. Oelschlagel and K. Yamaji, 325-s to 330-s, (Oct).
Development of a Direct Aging Filler Metal for Welding 15-5PH/17-4PH Steel – T. J. Bosworth and A. J. Zvanut, 159-s to 170-s, (June).
Development of An Improved Stainless Steel to Ferritic Steel Transition Joint – J. F. King, M. D. Sullivan and G. M. Slaughter, 354-s to 358-s, (Nov).
Development of the Thermo-Acoustic Upset-Butt Welding Process – G. N. Fischer and R. C. McMaster, 38-s to 50-s, (Feb).
Direct Aging Filler Metal for Welding 15-5PH/17-4PH Steel, Development of a – T. J. Bosworth and A. J. Zvanut, 159-s to 170-s, (June).
Dissimilar Metal Pipe Joints for 720 C Service, Brazed Nickel/Columbium – G. K. Watson and T. J. Moore, 306-s to 313-s, (Oct).

Effect of Inadequate Joint Penetration on Fatigue Resistance of High-Strength Structural Steel Welds – Y. Tobe and F. V. Lawrence, Jr., 259-s to 266-s, (Sept).
Effect of Minor Elements on Fusion-Zone Dimensions of Inconel 600 – W. F. Savage, E. F. Nippes and G. M. Goodwin, 126-s to 132-s, (Apr).
Effect of Minor Elements on Hot-Cracking Tendencies of Inconel 600 – W. F. Savage, E. F. Nippes and G. M. Goodwin, 245-s to 253-s, (Aug).
Effect of Shielding Gas Additions on the Penetration Characteristics of Plasma-Arc Welds – C. D. Lundin and W. J. Ruprecht, 1-s to 7-s, (Jan).
Effect of Welding Variables on Lamellar Tearing Susceptibility in the Lehigh Test – S. Ganesh and R. D. Stout, 78-s to 87-s, (Mar).
Effect of Wire Feed Speed on the Structure in Electroslag Welding of Low Carbon Steel, The – M. Solari and H. Biloni, 274-s to 280-s, (Sept).
Effects of Process Parameters on Thermal Distribution During Electroslag Welding – P. J. Konkol, 371-s to 379-s, (Dec).
Electrode Materials, A New Dimension in Resistance Welding – A. V. Nadkarni and E. P. Weber, 331-s to 338-s, (Nov).
Electrodes in N_2-CO_2 and N_2-Ar Atmospheres, Welding Flux Cored – Leonard B. Sis, 211-s to 216-s, (July).
Electron Beam Welds, High Cycle Fatigue Behavior of 5086-H116 Aluminum Alloy – R. R. Hardy, Jr., 8-s to 12-s, (Jan).
Electroslag Welding, Effects of Process Parameters on Thermal Distribution During – P. J. Konkol, 371-s to 379-s, (Dec).
Electroslag Welding of Low Carbon Steel, The Effect of Wire Feed Speed on the Structure in – M. Solari and H. Biloni, 274-s to 280-s, (Sept).
Electron Beam Welds in Uranium, Eliminating Cold-Shut Defects in Deep, Single-Pass – D. H. Wood and G. L. Mara, 88-s to 92-s, (Mar).
Elements on Fusion-Zone Dimensions of Inconel 600, Effect of Minor – W. F. Savage, E. F. Nippes and G. M. Goodwin, 126-s to 132-s, (Apr).
Eliminating Cold-Shut Defects in Deep, Single-Pass Electron Beam Welds in Uranium – D. H. Wood and G. L. Mara, 88-s to 92-s, (Mar).
Emission Spectroscopy for Welding Arc Analysis, Use of – G. S. Mills, 93-s to 96-s, (Mar).
Expulsion in Weldbonding of Anodized Aluminum, The Mechanism of – K. C. Wu, 238-s to 244-s, (Aug).

Factor for Stress Intensity at Welded Stiffeners and Cover Plates, Stress Gradient Correction – N. Zettlemoyer and J. W. Fisher, 393-s to 398-s, (Dec).
Fatigue Behavior of 5086-H116 Aluminum Alloy Electron Beam Welds, High Cycle – R. R. Hardy, Jr., 8-s to 12-s, (Jan).
Fatigue-Crack Propagation Behavior of Several Pressure Vessel Steels and Weldments – L. A. James, 386-s to 391-s, (Dec).
Fatigue Crack Propagation Life in Butt Joint Welds, Influence of Bending Stresses on – J. D. Burk and F. V. Lawrence, 61-s to 66-s, (Feb).
Fatigue Resistance of High-Strength Structural Steel Welds, Effect of Inadequate Joint Penetration on – Y. Tobe and F. V. Lawrence, Jr., 259-s to 266-s, (Sept).
Fatigue Resistance of Oxygen Cut Steel – R. Plecki, R. Yeske, C. Altstetter and F. V. Lawrence, Jr., 225-s to 230-s, (Aug).
Fatigue Service, Acceptance Levels of Weld Defects for – C. F. Boulton, 13-s to 22-s, (Jan).
Ferrite Stability at Elevated Temperature in Austenitic Stainless Steel Weld Metal, Technical Note: – J. E. Spruiell, W. E. Fett and C. D. Lundin, 289-s to 290-s, (Sept).
Ferritic Steel Transition Joint, Development of An Improved Stainless Steel to – J. F. King, M. D. Sullivan and G. M. Slaughter, 354-s to 358-s, (Nov).
Filler Metal BNi5, Investigations on the Capillary Flow of Brazing – E. Lugscheider and K. Iverson, 319-s to 324-s, (Oct).
Fluxless Induction Brazing of Aluminum in Air – K. C. Lin, 51-s to 55-s, (Feb).
Forged AISI 4130 and 1020 Mn Steels, Weldability of – R. A. Douty and H. Schwartzbart, 254-s to 258-s, (Aug).
Fracture Behavior of the Heat-Affected Zone in 5% Ni Steel Weldments – H. I. McHenry and R. P. Reed, 104-s to 112-s, (Apr).
Friction Welding Alloy 800 – K. H. Holko, 140-s to 142-s, (May).
Fume Growth with Time, An Investigation of Potential Health Hazards of Arc Welding – D. E. Clapp and R. J. Owen, 380-s to 385-s, (Dec).
Fundamental Difficulty in Charpy V-Notch Testing Narrow Zones in Welds, A – J. A. Goldak and D. S. Nguyen, 119-s to 125-s, (Apr).
Furnace Brazing of Steel with Brass Filler – I. Kawakatsu and T. Osawa, 56-s to 60-s, (Feb).

GTA Welding, Arc and Pool Instability in – J. C. Metcalfe and M. B. C. Quigley, 133-s to 139-s, (May).

Hazards of Arc Welding Fume Growth with Time, An Investigation of Potential Health – D. E. Clapp and R. J. Owen, 380-s to 385-s, (Dec).
HAZ Impact Toughness of a Mn-Mo-Nb Linepipe Steel, The – R. Eftekhar and C. D. Lundin, 113-s to 118-s, (Apr).
Health Hazards of Arc Welding Fume Growth with Time, An Investigation of Potential – D. E. Clapp and R. J. Owen, 380-s to 385-s, (Dec).
Heat-Affected Zone in 5% Ni Steel Weldments, Fracture Behavior of the – H. I. McHenry and R. P. Reed, 104-s to 112-s, (Apr).
Henniker Conference on: Welding R&D – Problems and Opportunities, Report on the – P. W. Ramsey, 29-s to 37-s, (Feb).
High Cycle Fatigue Behavior of 5086-H116 Aluminum Alloy

Electron Beam Welds – R. R. Hardy, Jr., 8-s to 12-s, (Jan).
High Toughness Fe-12% Ni Alloys Containing Ti, Al or Nb, Weldability of – J. H. Devletian, J. R. Stephens and W. R. Witzke, 97-s to 103-s, (Apr).
Hot-Cracking Tendencies of Inconel 600, Effect of Minor Elements on – W. F. Savage, E. F. Nippes and G. M. Goodwin, 245-s to 253-s, (Aug).

Inadequate Joint Penetration on Fatigue Resistance of High-Strength Structural Steel Welds, Effect of – Y. Tobe and F. V. Lawrence, Jr., 259-s to 266-s, (Sept).

Inclusion Formation in Arc Welding – G. Thewlis and D. R. Milner, 281-s to 288-s, (Sept).
Inconel 600, Effect of Minor Elements on Fusion-Zone Dimensions of – W. F. Savage, E. F. Nippes and G. M. Goodwin, 126-s to 132-s, (Apr).
Inconel 600, Effect of Minor Elements on Hot-Cracking Tendencies of – W. F. Savage, E. F. Nippes and G. M. Goodwin, 245-s to 253-s, (Aug).
Influence of Bending Stresses on Fatigue Crack Propagation Life in Butt Joint Welds – J. D. Burk and F. V. Lawrence, 61-s to 66-s, (Feb).
Influence of Cooling Rate and Composition on Weld Metal Microstructures in a C/Mn and a HSLA Steel, The – A. G. Glover, J. T. McGrath, M. J. Tinkler and G. C. Weatherly, 267-s to 273-s, (Sept).
Instability in GTA Welding, Arc and Pool – J. C. Metcalfe and M. B. C. Quigley, 133-s to 139-s, (May).
Intergranular Attack in Welded Stress-Corrosion Resistant Stainless Steel – J. Honeycombe and T. G. Gooch, 339-s to 353-s, (Nov).
Investigation of Hot Cracking in 5083-O Aluminum Alloy Weldments, An – J. C. Lippold, E. F. Nippes and W. F. Savage, 171-s to 178-s, (June).
Investigation of Potential Health Hazards of Arc Welding Fume Growth with Time, An – D. E. Clapp and R. J. Owen, 380-s to 385-s, (Dec).
Investigations on the Capillary Flow of Brazing Filler Metal BNi5 – E. Lugscheider and K. Iverson, 319-s to 324-s, (Oct).
Isostatically Pressed Prealloyed Titanium 6Al-4V Powder, Weldability of Hot – M. A. Greenfield, R. F. Geisendorfer, D. K. Haggard and L. P. Clark, 143-s to 148-s, (May).

Lamellar Tearing Susceptibility in the Lehigh Test, Effect of Welding Variables on – S. Ganesh and R. D. Stout, 78-s to 87-s, (Mar).
Lehigh Test, Effect of Welding Variables on Lamellar Tearing Susceptibility in the – S. Ganesh and R. D. Stout, 78-s to 87-s, (Mar).
Low Carbon Steel, The Effect of Wire Feed Speed on the Structure in Electroslag Welding of – M. Solari and H. Biloni, 274-s to 280-s, (Sept).

Mechanism of Expulsion in Weldbonding of Anodized Aluminum, The – K. C. Wu, 238-s to 244-s, (Aug).
Melting Phenomena in Solid State Welding Processes – H. Kreye, 154-s to 158-s, (May).
Metallurgical Studies of the Vacuum Brazing of Aluminum – W. A. Anderson, 314-s to 318-s, (Oct).
Minor Elements on Fusion-Zone Dimensions of Inconel 600, Effect of – W. F. Savage, E. F. Nippes and G. M. Goodwin, 126-s to 132-s, (Apr).
Minor Elements on Hot-Cracking Tendencies of Inconel 600, Effect of – W. F. Savage, E. F. Nippes and G. M. Goodwin, 245-s to 253-s, (Aug).

Narrow Zones in Welds, A Fundamental Difficulty in Charpy V-Notch Testing – J. A. Goldak and D. S. Nguyen, 119-s to 125-s, (Apr).
New Dimension in Resistance Welding Electrode Materials, A – A.V. Nadkarni and E. P. Weber, 331-s to 338-s, (Nov).
Ni Alloys Containing Ti, Al or Nb, Weldability of High Toughness Fe-12% – J. H. Devletian, J. R. Stephens and W. R. Witzke, 97-s to 103-s, (Apr).
Nickel/Columbium Dissimilar Metal Pipe Joints for 720 C Service, Brazed – G. K. Watson and T. J. Moore, 306-s to 313-s, (Oct).
Ni-Cu-Cb Line-Pipe Steel, Weldability of a – J. Gordine, 179-s to 185-s, (June).
Ni Steel Weldments, Fracture Behavior of the Heat-Affected Zone in 5% – H. I. McHenry and R. P. Reed, 104-s to 112-s, (Apr).

Oxygen Cut Steel, Fatigue Resistance of – R. Plecki, R. Yeske, C. Alstetter and F.V. Lawrence, Jr., 225-s to 230-s, (Aug).

Parameters on Thermal Distribution During Electroslag Welding, Effects of Process – P. J. Konkol, 371-s to 379-s, (Dec).
Pipe Joints for 720 C Service, Brazed Nickel/Columbium Dissimilar Metal – G. K. Watson and T. J. Moore, 306-s to 313-s, (Oct).
Pipe Steels, The Weldability of Some Arctic-Grade Line – J. Gordine, 201-s to 210-s, (July).
Pipe Steel, Weldability of a Ni-Cu-Cb Line – J. Gordine, 179-s to 185-s, (June).
Plasma-Arc Welds, The Effect of Shielding Gas Additions on the Penetration Characteristics of – C. D. Lundin and W. J. Ruprecht, 1-s to 7-s, (Jan).
Pool Instability in GTA Welding, Arc and – J. C. Metcalfe and M. B. C. Quigley, 133-s to 139-s, (May).
Prealloyed Titanium 6Al-4V Powder, Weldability of Hot Isostatically Pressed – M. A. Greenfield, R. F. Geisendorfer, D. K. Haggard and L. P. Clark, 143-s to 148-s, (May).
Pressure Vessel Steels and Weldments, Fatigue-Crack Propagation Behavior of Several – L. A. James, 386-s to 391-s, (Dec).
Propagation Behavior of Several Pressure Vessel Steels and Weldments, Fatigue-Crack – L. A. James, 386-s to 391-s, (Dec).
Properties of a Fully Austenitic Stainless Steel Weld Metal for Severe Corrosion Environments – A. Backman and B. Lundqvist, 23-s to 28-s, (Jan).

Report on the Henniker Conference on: Welding R&D–Problems and Opportunities – P. W. Ramsey, 29-s to 37-s, (Feb).
Resistance Welding Electrode Materials, A New Dimension in – A. V. Nadkarni and E. P. Weber, 331-s to 338-s, (Nov).

Semiconductor Devices, Clad Solder for – S. Mitsugi, D. Oelschlagel, K. Yamaguchi, K. Yamaji and K. Konishi, 301-s to 305-s, (Oct).
Series Spot Welds, Static Contact Resistance of – W. F. Savage, E. F. Nippes and F. A. Wassell, 365-s to 370-s, (Nov).
Shear Specimen, Calculation of Strength of Single-Lap – E. Lugscheider, H. Reiman and O. Knotek, 189-s to 192-s, (June).
Shielding Gas Additions on the Penetration Characteristics of Plasma-Arc Welds, The Effect of – C. D. Lundin and W. J. Ruprecht, 1-s to 7-s, (Jan).
Skylab Brazing Experiment, The – T. A. Siewert, R. H. Heine, C. M. Adams, Jr., and J. R. Williams, 291-s to 300-s, (Oct).
Solderability of Thick Film Substrate – T. Yoshiya and A.

Tamura, 359-s to 363-s, (Nov).
Solder for Semiconductor Devices, Clad – S. Mitsugi, D. Oelschlagel, K. Yamaguchi, K. Yamaji and K. Konishi, 301-s to 305-s, (Oct).
Solidification Structure and Resultant Properties with Yttrium Inoculation of Ti-6Al-6V-2Sn Welds, Controlled Weld-Pool – R. P. Simpson, 67-s to 77-s, (Mar).
Solid State Welding Processes, Melting Phenomena in – H. Kreye, 154-s to 158-s, (May).
Spectroscopy for Welding Arc Analysis, Use of Emission – G. S. Mills, 93-s to 96-s, (Mar).
Spot Weldability of Mn-Mo-Cb, V-N, and SAE 1008 Steels – J. M. Sawhill, Jr., H. Watanabe and J. W. Mitchell, 217-s to 224-s, (July).
Spot Welds, Static Contact Resistance of – W. F. Savage, E. F. Nippes and F. A. Wassell, 365-s to 370-s, (Nov).
Stainless Steel, Intergranular Attack in Welded Stress-Corrosion Resistant – J. Honeycombe and T. G. Gooch, 339-s to 353-s, (Nov).
Stainless Steel to Ferritic Steel Transition Joint, Development of An Improved – J. F. King, M. D. Sullivan and G. M. Slaughter, 354-s to 358-s, (Nov).
Stainless Steel Weldability Problem, Analysis of a High Manganese – G. S. Mills, 186-s to 188-s, (June).
Stainless Steel Weld Metal, Creep Crack Growth in a Type 316 – J. R. Haigh, 149-s to 153-s, (May).
Stainless Steel Weld Metal for Severe Corrosion Environments, Properties of a Fully Austenitic – A. Backman and B. Lundqvist, 23-s to 28-s, (Jan).
Static Contact Resistance of Series Spot Welds – W. F. Savage, E. F. Nippes and F. A. Wassell, 365-s to 370-s, (Nov).
Steels, Spot Weldability of Mn-Mo-Cb, V-N, and SAE 1008 – J. M. Sawhill, Jr., H. Watanabe and J. W. Mitchell, 217-s to 224-s, (July).
Steels, Weldability of Forged AISI 4130 and 1020 Mn – R. A. Douty and H. Schwartzbart, 254-s to 258-s, (Aug).
Steel, The HAZ Impact Toughness of a Mn-Mo-Nb Linepipe – R. Eftekhar and C. D. Lundin, 113-s to 118-s, (Apr).
Steel with Brass Filler, Furnace Brazing of – I. Kawakatsu and T. Osawa, 56-s to 60-s, (Feb).
Stiffeners and Cover Plates, Stress Gradient Correction Factor for Stress Intensity at Welded – N. Zettlemoyer and J. W. Fisher, 393-s to 398-s, (Dec).
Strength of Single-Lap Shear Specimen, Calculation of – E. Lugscheider, H. Reiman and O. Knotek, 189-s to 192-s, (June).
Stress-Corrosion Resistant Stainless Steel, Intergranular Attack in Welded – J. Honeycombe and T. G. Gooch, 339-s to 353-s, (Nov).
Stresses on Fatigue Crack Propagation Life in Butt Joint Welds, Influence of Bending – J. D. Burk and F. V. Lawrence, 61-s to 66-s, (Feb).
Stress Gradient Correction Factor for Stress Intensity at Welded Stiffeners and Cover Plates – N. Zettlemoyer and J. W. Fisher, 393-s to 398-s, (Dec).
Structural Steel Welds, Effect of Inadequate Joint Penetration on Fatigue Resistance of High-Strength – Y. Tobe and F. V. Lawrence, Jr., 259-s to 266-s, (Sept).
Study of Hydrogen Cracking in Underwater Steel Welds, A – H. Ozaki, J. Naiman and K. Masubuchi, 231-s to 237-s, (Aug).
Substrate, Solderability of Thick Film – T. Yoshiya and A. Tamura, 359-s to 363-s, (Nov).

Technical Note: Ferrite Stability at Elevated Temperature in Austenitic Stainless Steel Weld Metal – J. E. Spruiell, W. E. Fett and C. D. Lundin, 289-s to 290-s, (Sept).
Thermal Distribution During Electroslag Welding, Effects of Process Parameters on – P. J. Konkol, 371-s to 379-s (Dec).
Thermo-Acoustic Upset-Butt Welding Process, Development of the – G. N. Fischer and R. C. McMaster, 38-s to 50-s, (Feb).
Thick Film Substrate, Solderability of – T. Yoshiya and A. Tamura, 359-s to 363-s, (Nov).
Ti-6Al-6V-2Sn Welds, Controlled Weld-Pool Solidification Structure and Resultant Properties with Yttrium Inoculation of – R. P. Simpson, 67-s to 77-s, (Mar).
Titanium 6Al-4V Powder, Weldability of Hot Isostatically Pressed Prealloyed – M. A. Greenfield, R. F. Geisendorfer, D. K. Haggard and L. P. Clark, 143-s to 148-s, (May).
Toughness of a Mn-Mo-Nb Linepipe Steel, The HAZ Impact – R. Eftekhar and C. D. Lundin, 113-s to 118-s (Apr).
Transition Joint, Development of An Improved Stainless Steel to Ferritic Steel – J. F. King, M.D. Sullivan and G. M. Slaughter, 354-s to 358-s, (Nov).

Uranium, Eliminating Cold-Shut Defects in Deep, Single-Pass Electron Beam Welds in – D. H. Wood and G. L. Mara, 88-s to 92-s, (Mar).
Use of Emission Spectroscopy for Welding Arc Analysis – G. S. Mills, 93-s to 96-s, (Mar).

Vacuum Brazing of Aluminum, Metallurgical Studies of the – W. A. Anderson, 314-s to 318-s, (Oct).

Weldability of Forged AISI 4130 and 1020 Mn Steels – R. A. Douty and H. Schwartzbart, 254-s to 258-s, (Aug).
Weldability of High Toughness Fe-12% Ni Alloys Containing Ti, Al or Nb – J. H. Devletian, J. R. Stephens and W. R. Witzke, 97-s to 103-s, (Apr).
Weldability of Hot Isostatically Pressed Prealloyed Titanium 6Al-4V Powder – M. A. Greenfield, R. F. Geisendorfer, D. K. Haggard, and L. P. Clark, 143-s to 148-s, (May).
Weldability of Mn-Mo-Cb, V-N, and SAE 1008 Steels, Spot – J. M. Sawhill, Jr., H. Watanabe and J. W. Mitchell, 217-s to 224-s, (July).
Weldability of Some Arctic-Grade Line-Pipe Steels, The – J. Gordine, 201-s to 210-s, (July).
Weldability Problem, Analysis of a High Manganese Stainless Steel – G. S. Mills, 186-s to 188-s, (June).
Weld Defects for Fatigue Service, Acceptance Levels of – C. F. Boulton, 13-s to 22-s, (Jan).
Welding Flux Cored Electrodes in N_2-CO_2 and N_2-Ar Atmospheres – Leonard B. Sis, 211-s to 216-s, (July).
Welding Processes, Melting Phenomena in Solid State – H. Kreye, 154-s to 158-s, (May).
Weld Metal, Creep Crack Growth in a Type 316 Stainless Steel – J. R. Haigh, 149-s to 153-s, (May).
Weld Metal Microstructures in a C/Mn and a HSLA Steel, The Influence of Cooling Rate and Composition on – A. G. Glover, J. T. McGrath, M. J. Tinkler and G. C. Weatherly, 267-s to 273-s, (Sept).
Wire, Development of a Composite Brazing – H. Kawano, D. Oelschlagel and K. Yamaji, 325-s to 330-s, (Oct).
Wire Feed Speed on the Structure in Electroslag Welding of Low Carbon Steel, The Effect of – M. Solari and H. Biloni, 274-s to 280-s, (Sept).

Yttrium Inoculation of Ti-6Al-6V-2Sn Welds, Controlled Weld-Pool Solidification Structure and Resultant Properties with – R. P. Simpson, 67-s to 77-s, (Mar).

Zones in Welds, A Fundamental Difficulty in Charpy V-Notch Testing Narrow – J. A. Goldak and D. S. Nguyen, 119-s to 125-s, (Apr).

Part 2—AUTHOR INDEX

Adams, C. M., Jr., Williams, J. R., Siewert, T. A. and Heine, R. H. — The Skylab Brazing Experiment, 291-s to 300-s, (Oct).

Altstetter, C., Lawrence, F. V., Jr., Plecki, R. and Yeske, R. — Fatigue Resistance of Oxygen Cut Steel, 225-s to 230-s, (Aug).

Anderson, W. A. — Metallurgical Studies of the Vacuum Brazing of Aluminum, 314-s to 318-s, (Oct).

Backman, A. and Lundqvist, B. — Properties of a Fully Austenitic Stainless Steel Weld Metal for Severe Corrosion Environments, 23-s to 28-s, (Jan).

Biloni, H. and Solari, M. — The Effect of Wire Feed Speed on the Structure in Electroslag Welding of Low Carbon Steel, 274-s to 280-s, (Sept).
